MASTERS OF COMPACTION

## R2H-4

### **3-wheel roller equipped with Guardman® Auto Brake Assist System**

**Safety** is an increasingly important factor in the road building industry and we at SAKAI take this mission seriously. Every year **lives are tragically lost, personnel are severely injured, and equipment is damaged** from backup accidents all with costly results to contractors. These losses could be prevented in many cases.

**A first for the asphalt roller industry,** Guardman® detects personnel, equipment, or objects behind the roller. The operator is warned progressively and if no action is taken **automatically brakes when a collision is imminent.**

# R2H-4

with Guardman®

Guardman® for the R2H-4 asphalt roller works by using **3D LiDAR** in full integration with the machine's hydraulic drive and braking system. A sophisticated **intelligent controller compensates for compactor speed and day or night visibility.**

This safety option even **works through dust / steam** and was designed to be used for paving next to walls without worry of false alarms.

R2H-4 with Guardman®	
Applications	<ul style="list-style-type: none"><li>• No-vibe jobs</li><li>• Thin lifts &amp; bridge decks</li><li>• Highways, county &amp; city roads</li><li>• Racetracks &amp; road courses</li><li>• Finish rolling</li><li>• Longitudinal joint compaction</li></ul>
Compaction Width	83" (2,100mm)
Operating Weight	30,955 lbs (14,040 kg)
Static Linear Pressure	355 lbs/in (625N/cm) Front & Rear
Engine	73HP (54.6kW) Kubota V330? T4F
Warranty	3 Years / 3,000 Hours

**Save lives, stop injuries, and prevent equipment damage with Guardman®**
